

*Dalmatian Pelican in the Danube Delta (Márton Molnár)*

## **DANUBE DELTA & DOBRUDJA IN SPRING** with **SAKERTOURS** **17<sup>th</sup> – 24<sup>th</sup> May, 2025**

**Leader: Márton Molnár**

As always, we spent a fantastic time this year in the Danube Delta and the surrounding regions. The tour was thankfully completed without a single hitch. We were able to admire an amazing birdlife on the extensively used farmlands and stunning wetland habitats of Dobrudja. The endless reeds of the Danube Delta did not disappoint, nor did the slopes of the Macin Mountains. Rural hospitality also made our trip enjoyable, the delicious food and the friendly service will also remain memorable. A late Spring affected a number of our target species but did not stop us from seeing a fantastic selection of birds and other wildlife. Thanks to the late migration, we successfully added three new species to the all-time list of this tour: the Greater Spotted Eagle, Great White-fronted Goose, and the Pine Siskin - and one more by chance: the Tawny Owl.

The highlight of this year's tour was definitely an amazing flock of 384 Broad-billed Sandpiper in Dobrudja! The massive migration of birds of prey was also outstanding this year, we saw Greater Spotted Eagle, Eastern Imperial Eagle, 6 Lesser Spotted Eagles, over 10 Booted Eagles, 5 Short-toed Snake Eagles, 3 Black Kites, over 30 European Honey Buzzards and 2 Montagu's Harriers. We successfully saw also all 8 species of woodpeckers which are possible in the region. Besides, target birds such as Great White and Dalmatian Pelican, Black Stork, Ferruginous Duck, all four species of Grebes, Pallas's Gull, Collared Pratincole, Little Bittern, Squacco Heron, Pygmy Cormorant, Levant Sparrowhawk, Long-eared and Little Owl, Common Rock Thrush, Pied Wheatear, Thrush Nightingale, Eastern Olivaceous Warbler, Red-breasted Flycatcher, Sombre Tit, Rosy Starling, Woodchat Shrike and Black-headed Bunting were also spotted. At the end, we finished the tour with 190 species.

## 17<sup>th</sup> May (Saturday)

After picking up all the guests on the bus, we left the airport area near Bucharest-Otopeni heading east towards the Black Sea coast. We had barely gone a short distance when we spotted the first noteworthy species – a Lesser Spotted Eagle was hunting alongside the motorway. We had a short stop for a sandwich lunch then we arrived to Lake Techirgiol. This year, the water level of the lake was pretty high, so there were much fewer birds on it. Nevertheless, we still had many interesting sightings, such as Little Gulls, Whiskered Terns, Black-necked Grebes, and a big flock of Great White Pelicans. As usual, it wasn't just the lake itself that was exciting, but also the surrounding habitats. An Eurasian Stone Curlew flying by really thrilled us. Besides we picked up a singing Cetti's Warbler, Marsh Warbler, Common Whitethroat and our first Spanish Sparrow.

Our next stop was at a port on the Black Sea, where we found a calm corner with plenty of birds. Here we saw some great species like Paddyfield Warbler, a single Red-rumped Swallow, Great White and Dalmatian Pelicans, two Sandwich Terns while we were enjoying the charming song of another Cetti's Warbler in the background. There was nothing left to do but reach our accommodation; however, we had to make one more stop along the way, as we spotted a large flock of starlings on a freshly mown alfalfa field. After a minute long scanning we successfully found 6 Rosy Starlings amongst the European Starlings. At that moment, we felt that yes, we had truly arrived in Dobrudja! Finally we reached our accommodation and had a fantastic dinner.

*Male Pied Wheatear in the Dobrudja area (Márton Molnár)*

## 18<sup>th</sup> May (Sunday)

We started the day with a prebreakfast birding near the village of Vadu. We visited some nice reed beds where the birds were really active during the early hours. We successfully saw our main target bird, the Paddyfield Warbler. We had excellent views of several singing males on the top of the reed vegetation. Besides we observed several Great Bitterns, Savi's Warblers, Great Reed Warbler, Common Reed Warbler, Bearded Reedlings, and Water Rail. We also added Garden Warbler to the list, as we spotted a singing male in a bush.

After breakfast we headed towards Sitorman rock quarry, but on the way we still had so many birds to see. We enjoyed fantastic bird richness of the extensively used farmlands along the road, an amazing number of Skylarks, Yellow Wagtails, Corn Buntings, Red-footed Falcons, Rollers were seen. We also picked up some important target birds such as Calandra Lark, Greater Short-toed Lark, Black-headed Bunting, and Grey Partridge. Finally we reached the quarry, where we enjoyed fantastic views of a Pied Wheatear pair, our main target bird in this area. The area is also famous for its European Ground Squirrel population which attracts a nice variety of raptors. We had good views of the squirrels, Long-legged Buzzards, and Booted Eagles alike, not to mention the Isabelline Wheatears, and Ortolan Buntings also hanging around, and a flock of Rosy Starlings passing by.

After lunch in a nice restaurant, we spent some time on a nearby grassland where we saw only some common species. So we continued to Lake Tuzla to increase our list with shorebirds. At first glance, it was clear that this would be an exciting spot, as there were many birds in the shallow water and on the mud surface. We started to check the sandpipers at first. Amongst the numerous Curlew Sandpipers and Little Stints we spotted two Broad-billed Sandpiper very quickly. As it is a top target bird, we waited until everyone had a good look through the scope. Then we moved the scope further, and it turned out that there were literally Broad-billed Sandpipers everywhere. We counted no less, than 254 individuals! It was just simply amazing to watch these cute creatures in such a good number. Not to mention that two Red-necked Phalaropes in breeding plumage, about forty Collared Pratincoles, four Temminck's Stints, two White-winged Terns, about 300 Greater Flamingos, and several other wetland birds were present in the area.

*Red-rumped Swallow collecting nest material (Márton Molnár)*

## 19<sup>th</sup> May (Monday)

Today we had a short prebreakfast birding again just near the hotel. Besides Spotted Flycatchers, Lesser Grey Shrikes, Tree Pipits we also spotted a small flock of Rosy Starlings, and an adult Pallas's Gull flying overhead. It was a short, but successful morning session.

After breakfast we moved to Histria where we found the wetlands dried out, holding only a small flock of Collared Pratincoles, a few Northern Lapwings, and several Red-footed Falcons. Still, we couldn't be disappointed, as the favourable wind allowed us to witness the migration of larger birds. Hundreds of White Storks, a single Black Stork, a Black Kite, two Lesser Spotted Eagles, over ten European Honey Buzzards flew over the area. Before lunch we paid a short visit to the quarry again to search for more raptors. Long-legged Buzzards and Booted Eagles delighted us again.

After lunch in the nearby restaurant, we went to the Beach of Vadu. An afternoon sea-watching produced Caspian Tern, Mediterranean Gull, Black-necked Grebe, Common and Little Ringed Plover, and a migrating Montague's Harrier. We finished the day at Lake Tuzla again, as it was fantastic yesterday. It didn't disappoint us. This time we counted even more Broad-billed Sandpipers, no less than 384 were present! This was absolutely the highlight of the tour. This time we could spend more time on the Collared Pratincole colony, the birds gave us a fantastic show from a short distance. We enjoyed excellent views of displaying and mating birds too. The huge number of gulls, terns, ducks, shelducks, waders was also amazing.

*Rosy Starlings and a light morph Booted Eagle (Márton Molnár)*

## 20<sup>th</sup> May (Tuesday)

In the morning we headed north after breakfast. On the way towards Tulcea we made three stops near the Babadag region. At first, we at a random White Stork nest to get close views of a Spanish Sparrow breeding colony. Besides having perfect scope views of the Spanish Sparrows, we picked up a singing Common Nightingale too.

Our second stop targeted a mosaic habitat made up of grasslands, shrublands, and patches of oak forest. It wasn't just the sight of the beautiful old oaks that was delightful – the birds were equally enjoyable. Quickly after we unloaded the bus, we spotted our first target birds; a pair of Woodchat Shrikes was sitting on the bushes. Sadly, we failed to find our other target species, the Sombre Tit, while walking around this peaceful place. No problem – in return, we saw plenty of other birds such as a Lesser Spotted Eagle, three Short-toed Eagle, a Green Woodpecker, a European Turtle Dove, and a singing Woodlark. A European Stonechat, several Ortolan Buntings, and two male Black-headed Buntings also delighted us on the way back to the main road.

Before reaching Tulcea city, of course, we visited the famous Babadag forest. Walking in the dense forest and listening to the birds singing everywhere was fantastic. Moreover, we picked up some of the target birds. We enjoyed excellent views of Icterine Warbler, Wood Warbler, Marsh Tit, and a male Red-breasted Flycatcher. As always, it was hardworking to find Middle Spotted Woodpecker, but finally we managed to see one briefly. Babadag forest gave us nice memories again.

Soon we reached Tulcea city where we had an afternoon break with a lunch. Finally, one of the most exciting parts of the tour could begin: visiting the Danube Delta. Our boatman was a local resident who knew the delta extremely well and guided us fantastically through the endless channels and reed beds. After leaving the port we went through a well-forested part of the area where we managed to see a beautiful male Collared Flycatcher. As we continued our boat trip we picked up more and more goodies such as Eastern Olivaceous Warbler, Grey-headed Woodpecker, White-tailed Eagle, Common Redstart. We also enjoyed the first large flock of Great White Pelicans, and two adult Pallas's Gulls. The highlight of the day was an absolute surprise; a Greater Spotted Eagle flew overhead. It was a very late migrant, as they usually leave Romania by early April. We arrived to our hotel in the evening very satisfied.

*Lesser Grey Shrike (Márton Molnár)*

### **21<sup>st</sup> May (Wednesday)**

A prebreakfast walk around the hotel resulted in seeing Black Woodpecker, Penduline Tit, and Golden Orioles. After breakfast we started our morning programme in the Delta on boat. An immature Eastern Imperial Eagle was quite a surprise at the beginning. Soon after we heard a singing Thrush Nightingale which we managed to see very well in the canopy of the willow trees, a migrant Red-breasted Flycatcher was also spotted nearby. Several flocks of Great White Pelicans, Dalmatian Pelicans, two more Pallas's Gulls, Red-necked Grebes, Squacco Herons, Black-crowned Night Herons, Glossy Ibises and many other great birds – too many to mention – made the rest of the morning boat trip thoroughly enjoyable.

After lunch we had a siesta, after which we started our afternoon boat trip. At first we visited a fantastic mixed breeding colony of Black-headed Gulls, Common Terns, Whiskered Terns, Great Crested Grebes, and Black-headed Grebes. We also spotted Little Grebe just to make the list of grebes complete. After that we visited several more canals and lakes, and we really enjoyed the fantastic wildlife of the Danube Delta. Besides the common local birds we spotted a Caspian Tern, and a Cattle Egret too. But the greatest spot of this afternoon session was an adult Long-eared Owl, sitting on a large willow tree. We were able to watch it for a few minutes when it finally decided to fly away.

Since we still had half an hour until dinner, we decided to take a short walk near the hotel. This decision really paid off as we spotted a fantastic male Little Bittern having sunbath on a bush. Perfect end of a fantastic day in the Danube Delta.

*We had great views of several adult White-tailed Eagles in the Danube Delta (Márton Molnár)*

*Black-crowned Night Heron and European Roller (Márton Molnár)*

## 22<sup>nd</sup> May (Thursday)

Today we still had a morning on boat in the fantastic Danube Delta. During the last two days we have failed to see Lesser Spotted Woodpecker, therefore we visited a canal lined with old willow trees. This habitat really favours for woodpeckers, so we managed to see the Lesser Spotted Woodpecker, and one more Grey-headed Woodpecker as a bonus. There was nothing left to do than slowly leave the delta and enjoy the last sightings of Pelicans, Pygmy Cormorants, Glossy Ibises, and much more.

In the afternoon we headed to Macin. On the way we stopped at Horia forest where we took a longer walk. Our main target bird was Sombre tit here, which we managed to see very quickly. We just left the minibus when we heard a strange call from the bushes. A few seconds later we already watching a Sombre Tit pair moving around the bushes and oaks. Fantastic sighting of a hard-to-see species! We took a few hundred meters where we could enjoy scope views of a Middle Spotted Woodpecker. It was satisfying that we saw it much better than last time in the Babadag forest. Common Nightingale, Hawfinch, and Green Woodpecker were also appreciated at this area, as was a Longhorn Beetle crossing the road. Last, but not least we managed to have brief views of a Wryneck pair, just to complete the list of woodpeckers. After Horia forest we visited a nearby lake where we spotted Black Stork, Ruddy Shelducks and a flock of 50 Rosy Starlings. Soon a heavy storm forced us to stop birdwatching and head to our accommodation.

*Great White Pelican taking off (Márton Molnár)*

## 23<sup>rd</sup> May (Friday)

Our main target birds were Common Rock Thrush and Levant Sparrowhawk today. In the early morning we started in a huge quarry – before it starts working - to search for the former species. We scanned the rocky slopes for an hour without any results, we were rewarded only with a Little Owl hunting from the electricity poles on the way back.

After breakfast we visited a nice viewpoint on the hill to search for the other target bird, the Levant Sparrowhawk. We didn't have to wait too much, a beautiful male turned up in the distance. Later it came very close and a female also joined him, so we had excellent views of them. As if that weren't enough, we also had scope views of a Syrian Woodpecker on the neighbouring slope, foraging on a deadwood. Since we had been so lucky, we thought we'd try again to see the Common Rock Thrush. So we spent the next hour on another long scanning. Sadly, we failed again to find the target bird. Although we knew it would be difficult to find the thrush on the steep slopes, this was still a bit too much. However, we were rewarded with a male Eastern Black-eared Wheatear this time, a rare species in Romania.

After lunch and an afternoon rest we paid a visit to a nearby lake. We found wonderful waterfowl on the lake, hundreds of birds were present on the shallow water. We saw Glossy Ibis, Ruddy Shelduck, Whiskered Tern, Black Stork, not to mention two new species to the triplist; Greater White-fronted Goose, and Eurasian Wigeon. We didn't have too much left than go back to the quarry again. We didn't start scoping with much enthusiasm, as the previous two failed attempts had dampened our spirits. This time, however, we finally succeeded! A male Common Rock Thrush was sitting on a huge rock, on the top of the hill. We could go back to the accommodation with a huge satisfaction. During the night we had a big surprise, a Tawny Owl was audible from our guesthouse.

*Male Levant Sparrowhawk in the Macin region (Márton Molnár)*

## 23<sup>rd</sup> May (Friday)

Our main target birds were Common Rock Thrush and Levant Sparrowhawk today. In the early morning we started in a huge quarry – before it starts working - to search for the former species. We scanned the rocky slopes for an hour without any results, we were rewarded only with a Little Owl hunting from the electricity poles on the way back.

After breakfast we visited a nice viewpoint on the hill to search for the other target bird, the Levant Sparrowhawk. We didn't have to wait too much, a beautiful male turned up in the distance. Later it came very close and a female also joined him, so we had excellent views of them. As if that weren't enough, we also had scope views of a Syrian Woodpecker on the neighbouring slope, foraging on a deadwood. Since we had been so lucky, we thought we'd try again to see the Common Rock Thrush. So we spent the next hour on another long scanning. Sadly, we failed again to find the target bird. Although we knew it would be difficult to find the thrush on the steep slopes, this was still a bit too much. However, we were rewarded with a male Eastern Black-eared Wheatear this time, a rare species in Romania.

After lunch and an afternoon rest we paid a visit to a nearby lake. We found wonderful waterfowl on the lake, hundreds of birds were present on the shallow water. We saw Glossy Ibis, Ruddy Shelduck, Whiskered Tern, Black Stork, not to mention two new species to the triplist; Greater White-fronted Goose, and Eurasian Wigeon. We didn't have too much left than go back to the quarry again. We didn't start scoping with much enthusiasm, as the previous two failed attempts had dampened our spirits. This time, however, we finally succeeded! A male Common Rock Thrush was sitting on a huge rock, on the top of the hill. We could go back to the accommodation with a huge satisfaction. During the night we had a big surprise, a Tawny Owl was audible from our guesthouse.

## 24<sup>th</sup> May (Saturday)

Today we had only a very short morning before travelling to Bucharest. We took a walk in a nearby woodland and searched for potential new birds to the triplist. A singing Wood Warbler, an Icterine Warbler, a flyover Pine Siskin were the best. In addition, a Sombre Tit really surprised us when it came out from the dense vegetation. We didn't expect this species here.

We said goodbye with full of nice memories to this fantastic region, and after breakfast, we set off for Bucharest.

*Paddyfield Warbler and Common Whitethroat (Márton Molnár)*

## BIRDS – list of bird species recorded on the 2025 tour

C = Commonly seen, more than 10 individuals

'Numbers' = Actual number seen on the tour

H = Heard only

LO = Leader only

NL = Non-leader

1	Greylag Goose	<i>Anser anser</i>	C
2	Greater White-fronted Goose	<i>Anser albifrons</i>	6
3	Mute Swan	<i>Cygnus olor</i>	C
4	Common Shelduck	<i>Tadorna tadorna</i>	C
5	Ruddy Shelduck	<i>Tadorna ferruginea</i>	C
6	Garganey	<i>Spatula querquedula</i>	C
7	Northern Shoveler	<i>Spatula clypeata</i>	C
8	Gadwall	<i>Mareca strepera</i>	C
9	Eurasian Wigeon	<i>Mareca penelope</i>	2
10	Mallard	<i>Anas platyrhynchos</i>	C
11	Red-crested Pochard	<i>Netta rufina</i>	C
12	Common Pochard	<i>Aythya ferina</i>	C

*Female Pied Wheatear (Márton Molnár)*

13	Ferruginous Duck	<i>Aythya nyroca</i>	C
14	Grey Partridge	<i>Perdix perdix</i>	1
15	Common Quail	<i>Coturnix coturnix</i>	H
16	Common Pheasant	<i>Phasianus colchicus</i>	C
17	Little Grebe	<i>Tachybaptus ruficollis</i>	5
18	Red-necked Grebe	<i>Podiceps grisegena</i>	6
19	Great Crested Grebe	<i>Podiceps cristatus</i>	C
20	Black-necked Grebe	<i>Podiceps nigricollis</i>	C
21	Greater Flamingo	<i>Phoenicopterus roseus</i>	300
22	Black Stork	<i>Ciconia nigra</i>	4
23	White Stork	<i>Ciconia ciconia</i>	C
24	Glossy Ibis	<i>Plegadis falcinellus</i>	C
25	Eurasian Spoonbill	<i>Platalea leucorodia</i>	5
26	Eurasian Bittern	<i>Botaurus stellaris</i>	H
27	Little Bittern	<i>Ixobrychus minutus</i>	1
28	Black-crowned Night Heron	<i>Nycticorax nycticorax</i>	C
29	Squacco Heron	<i>Ardeola ralloides</i>	C
30	Western Cattle Egret	<i>Bubulcus ibis</i>	1
31	Grey Heron	<i>Ardea cinerea</i>	C
32	Purple Heron	<i>Ardea purpurea</i>	C
33	Great Egret	<i>Ardea alba</i>	C
34	Little Egret	<i>Egretta garzetta</i>	C
35	Great White Pelican	<i>Pelecanus onocrotalus</i>	C
36	Dalmatian Pelican	<i>Pelecanus crispus</i>	C

*Spotted Flycatcher (Márton Molnár)*

37	Pygmy Cormorant	<i>Microcarbo pygmeus</i>	C
38	Great Cormorant	<i>Phalacrocorax carbo</i>	C
39	European Honey Buzzard	<i>Pernis apivorus</i>	32
40	Short-toed Snake Eagle	<i>Circaetus gallicus</i>	5
41	Lesser Spotted Eagle	<i>Clanga pomarina</i>	6
42	Greater Spotted Eagle	<i>Clanga clanga</i>	1
43	Booted Eagle	<i>Hieraetus pennatus</i>	C
44	Eastern Imperial Eagle	<i>Aquila heliaca</i>	1
45	Levant Sparrowhawk	<i>Accipiter brevipes</i>	2
46	Eurasian Sparrowhawk	<i>Accipiter nisus</i>	2
47	Western Marsh Harrier	<i>Circus aeruginosus</i>	C
48	Montagu's Harrier	<i>Circus pygargus</i>	2
49	Black Kite	<i>Milvus migrans</i>	3
50	White-tailed Eagle	<i>Haliaeetus albicilla</i>	C
51	Long-legged Buzzard	<i>Buteo rufinus</i>	C
52	Common Buzzard	<i>Buteo buteo</i>	C
53	Water Rail	<i>Rallus aquaticus</i>	H
54	Common Moorhen	<i>Gallinula chloropus</i>	C
55	Eurasian Coot	<i>Fulica atra</i>	C
56	Eurasian Stone-curlew	<i>Burhinus oedicnemus</i>	1
57	Black-winged Stilt	<i>Himantopus himantopus</i>	C
58	Pied Avocet	<i>Recurvirostra avosetta</i>	C
59	Northern Lapwing	<i>Vanellus vanellus</i>	C

Woodchat Shrike (Márton Molnár)

60	Common Ringed Plover	<i>Charadrius hiaticula</i>	C
61	Little Ringed Plover	<i>Charadrius dubius</i>	4
62	Black-tailed Godwit	<i>Limosa limosa</i>	C
63	Ruff	<i>Calidris pugnax</i>	C
64	Broad-billed Sandpiper	<i>Calidris falcinellus</i>	384
65	Curlew Sandpiper	<i>Calidris ferruginea</i>	C
66	Temminck's Stint	<i>Calidris temminckii</i>	4
67	Dunlin	<i>Calidris alpina</i>	C
68	Little Stint	<i>Calidris minuta</i>	C
69	Red-necked Phalarope	<i>Phalaropus lobatus</i>	2
70	Common Sandpiper	<i>Actitis hypoleucos</i>	1
71	Common Redshank	<i>Tringa totanus</i>	C
72	Wood Sandpiper	<i>Tringa glareola</i>	C
73	Common Greenshank	<i>Tringa nebularia</i>	1
74	Collared Pratincole	<i>Glareola pratincola</i>	C
